

device tailored software...  
customer focused solutions™

*I would recommend Naurtech for any Windows CE Telnet or Browser application. Great product and excellent support.*

- Paul Speese,  
CEO DataVision

Naurtech Corporation develops rich client applications to provide mobile access to enterprise data using Windows CE platform devices. Our products are used in data collection solutions across multiple vertical markets.

## Mobile Terminal Emulation and Web Browsers

Over the recent years, wireless technology has become ubiquitous. Companies are looking to mobilize their workers to gain business process efficiencies and offer superior customer service by making business-critical data and applications accessible at anytime, from anywhere. Majority of Fortune 1000 companies maintain such business applications on IBM mainframes, Unix hosts and Web servers. Our products allow corporate workers to extend access of this business logic to roaming wireless handhelds thus helping them derive maximum operational efficiencies.

Using our products you can turn your data into knowledge, which you can rely upon to make your everyday business decisions intelligently. Our solutions are all about helping you manage your business critical information by providing you improved ways to collect, access and update it, at anytime, from anywhere. We make it possible to cost-effectively automate a wide variety of workflow processes by providing access to your in-house legacy production systems, in real-time.

This not only minimizes data entry errors, but it allows you to do more in less time thus affecting your bottom line. Your workers get access to the data that they require to respond to your customers more accurately and expediently.

### Grow with the new market leader

Naurtech Corporation has built a strong reputation for providing superior quality, innovative products, backed by responsive customer and partner support. Since their introduction in May 2001, our products are used by over 850 customers in 21 countries. Our growing list of satisfied customers includes well known names like CarreFour, Target, Food Lion, Intel, Stein Mart, DHL, Coca Cola, Federal Express, Boeing, Siemens and others. Two of the world's top five largest retailers use our products in their production environment. Our continued business success is a direct result of our investment in new technology solutions, product innovation, support of new device platforms and responsive support for our partners.
